- 2. Windows Firewall turned off: [Control Panel] Move

🔐 Windows Firewall Settings 🛛 🔀
General Exceptions Advanced
Windows Firewall is helping to protect your computer
Windows Firewall can help prevent hackers or malicious software from gaining access to your computer through the Internet or a network.
On (recommended) This setting blocks all outside sources from connecting to this computer, except for those unblocked on the Exceptions tab.
Block all incoming connections
Select this option when you connect to less secure networks. All exceptions will be ignored and you will not be notified when Windows Firewall blocks programs.
🔯 💿 Off (not recommended)
Avoid using this setting. Turning off Windows Firewall will make this computer more vulnerable to hackers or malicious software.
Tell me more about these settings
OK Cancel Apply
