## **INSTRUCTION MANUAL** Ver 2.1

MICRO 10x SPEED DOME CAMERA

This lightning flash with arrowhead symbol is intended to alert the user to the presence of un-insulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This exclamation point symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

## WARNING : TO PREVENT THE RISK OF FIRE OR ELECTRIC SHOCK HAZARD, DO NOT EXPOSE THIS CAMERA TO RAIN OR MOISTURE.

#### **Important Safeguard**

#### 1. Read Instructions

Read all of the safety and operating instructions before using the product.

#### 2. Retain Instructions

Save these instructions for future reference.

#### 3. Attachments / Accessories

Do not use attachments or accessories unless recommended by the appliance manufacturer as they may cause hazards, damage product and void warranty.

NOTICE

#### 4. Water and Moisture

Do not use this product near water or moisture.

#### 5. Installation

Do not place or mount this product in or on an unstable or improperly supported location. Improperly installed product may fall, causing serious injury to a child or adult, and damage to the product. Use only with a mounting device recommended by the manufacturer, or sold with the product. To insure proper mounting, follow the manufacturer's instructions and use only mounting accessories recommended by manufacturer.

#### 6. Power source

This product should be operated only from the type of power source indicated on the marking label.

#### Precautions

#### Operating

- Before using, make sure power supply and others are properly connected.
- While operating, if any abnormal condition or malfunction is observed, stop using the camera immediately and then contact your Special dealer.

#### Handling

- Do not disassemble or tamper with parts inside the camera.
- Do not drop or subject the camera to shock and vibration as this can damage camera.
- Care must be taken when you clean the clear dome cover. Especially, scratch and dust will ruin your quality of camera.

#### □ Installation and Storage

- Do not install the camera in areas of extreme temperature, which exceed the allowable range.
- Avoid installing in humid or dusty places.
- Avoid installing in places where radiation is present.
- Avoid installing in places where there are strong magnetic fields and electric signals.
- Avoid installing in places where the camera would be subject to strong vibrations.
- Never expose the camera to rain and water.

#### Features

#### **Camera Specifications**

- CCD Sensor : 1/4" Interline Transfer CCD
- Zoom Magnification :× 10 Optical Zoom, × 10 Digital Zoom (Max × 100 Zoom)
- Day & Night Function
- Various Focus Mode: Auto-Focus / Manual Focus / Semi-Auto Focus.
- Independent & Simultaneous Camera Characteristic Setup in Preset operation

#### Dewerful Pan/Tilt Functions

- Max. 360°/sec high speed Pan/Tilt Motion
- Using Vector Drive Technology, Pan/Tilt motions are accomplished in a shortest path. As a result, time to target view is reduced dramatically and the video on the monitor is very natural to watch.
- For jog operation using a controller, since ultra slow speed 0.05°/sec can be reached, it is very easy to locate camera to desired target view. Additionally it is easy to move camera to a desired position with zoom-proportional pan/tilt movement.

#### Dereset, Pattern, Scan, Group, Privacy Mask, Schedule and More...

- MAX. 127 Presets are assignable and characteristics of each preset can be set up independently, such as White Balance, Auto Exposure, Label and so on.
- Max. 8 set of Scan action can be stored. This enables to move camera repetitively between two preset positions with designated speed.
- Max. 4 of Patterns can be recorded and played back. This enables to move camera to follow any trajectory operated by joystick as closely as possible.
- Max. 8 set of Group action can be stored. This enables to move camera repetitively with combination of Preset or Pattern or Scan. A Group is composed of max. 20 entities of Preset/Pattern/Scans.
- Privacy Masks are assignable, not to intrude on other's privacy. (4 Privacy Zones)
- 7 rules of Schedule can be assigned by day and time. Appropriate actions (such as Home, Preset, Group, Pattern, Scan) can be defined for each rule. Also, it is possible to make rule by Weekday and weekend to simplify the rule.

#### D PTZ(Pan/Tilt/Zoom) Control

- $\bullet$   $\;$  With RS-485 communication, max. 255 of cameras can be controlled at the same time.
- Pelco-D or Pelco-P protocol can be selected as a control protocol in the current version of firmware.

#### 🗖 OSD(On Screen Display) Menu

- OSD menu is provided to display the status of camera and to configure the functions interactively.
- The information such as Camera ID, Pan/Tilt/Zoom/Direction, Alarm Input & Output, date/time, current temperature and Preset can be displayed on screen.
- Each display item can be turned on or off independently.

#### □ Alarm I/O Functions

- 2 alarm sensor Inputs and 1 relay output are available.
- To reject external electric noise and shock perfectly, alarm sensor Input is decoupled with photo coupler.
- The signal range of sensor input is from DC 5.0 to 12.0 volts to adopt various applications.
- If an external sensor is activated, camera can be set to move to the corresponding Preset position.
- Relay output can be assigned to work with a certain preset.

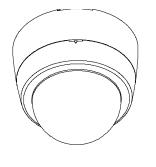

#### **D** Reserved Presets for Special Purpose

• Most camera characteristics can be set up easily and directly with reserved preset, not entering into OSD menu. For more information, refer to "Reserved Preset" in this manual and "Direct Key Command" Manual.

INTRODUCTION (1)

## Product & Accessories

 $\hfill\square$  Product & Accessories

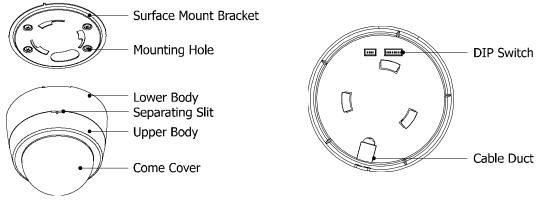

• Surface Mount Bracket

## Parts Name & Functions

• Main Unit / Surface Mount Bracket

- Surface Mount Bracket This is used to install the camera directly on the ceiling. After separating this cover first and then attach this directly to ceiling. Camera must be assembled at the last stage. Do not use this bracket when installing camera on the wall with wall mount bracket or on the ceiling with ceiling mount bracket.
  Separating Slit Using a coin, you can separate upper part lower body of the dome.
  Do not detach protection vinyl from dome cover before finishing all installation process to protect dome cover from scratches or dust.
  DIP Switch Adjusts camera ID and protocols.
  When you want to install the camera on the surface of hard ceiling,
- Cable Duct When you want to install the camera on the surface of hard ceiling, you need to handle the cable through side of the dome. In this case, break the side wall bit and make the cable pass through the cable duct.

INSTALLATION

2

## DIP Switch Setup

Before you install the camera, you should set the DIP switches to configure the camera ID, communication protocol.

Communication								<u> </u>	'aw	iera	- т <b>г</b>	`
Protocol									dIL	ler	a IL	_
	•					ſ						
OF	TIONS	5		AD	DR	RES	S (I	D)				
ON ☐		]										
ΟΡΤΙΟ	NS			ADDR	ESS	(ID)						
PIN	PIN 1 2 3 4		PIN	1	2	3	4	5	6	7	8	
FUNC.	PROTOCOL	N/P		FUNC.	A0	A1	A2	A3	A4	A5	A6	A7
ON		PAL		ON	1	2	4	8	16	32	64	128
OFF	the manual	NTSC	Termi Resis	OFF	0	0	0	0	0	0	0	0
+PROTOCOL	0 0 1 0 0 1	Pelco I Pelco I Pelco I	D,2400 D,9600 P,4800	•EX> ID=1		off off	off off	off on	off off	off off	off off	off off
	1   1	Pelco-	P, 9600	U-9	. 011			UII			ψΠ	ψΠ

#### 🗖 Camera ID Setup

$ \begin{array}{c} \text{ON} \\ \uparrow \\ 1 \\ 2 \\ 3 \\ 4 \\ 5 \\ 6 \\ 7 \\ 8 \end{array} $
--

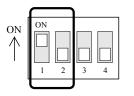

• ID number of camera is set using binary number. The example is shown bellow.

Pin	1	2	3	4	5	6	7	8
ID Value	1	2	4	8	16	32	64	128
ex) ID=5	on	off	on	off	off	off	off	off
ex) ID=10	off	on	off	on	off	off	off	off

- The range of ID is 1~255. **Do not use 0 as camera ID**. Factory default of Camera ID is 1.
- If you want to control a certain camera, you must match the camera ID with Cam ID setting of DVR or Controller.

INSTALLATION

#### $\hfill\square$ Communication Protocol Setup

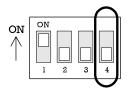

Switch	n State	
P0 (Pin 1)	P1 (Pin 2)	Protocol
OFF	OFF	PELCO-D, 2400 bps
ON	OFF	PELCO-D, 9600 bps
OFF	ON	PELCO-P, 4800 bps
ON	ON	PELCO-P, 9600 bps

- If you want to control using DVR or P/T controller, their protocol must be identical to camera. Otherwise, you can not control the camera.
- If you changed camera protocol by changing DIP S/W, the change will be effective after you reboot the camera.
- Factory default of protocol is "Pelco-D, 2400 bps".

□ Reserved for Supplier

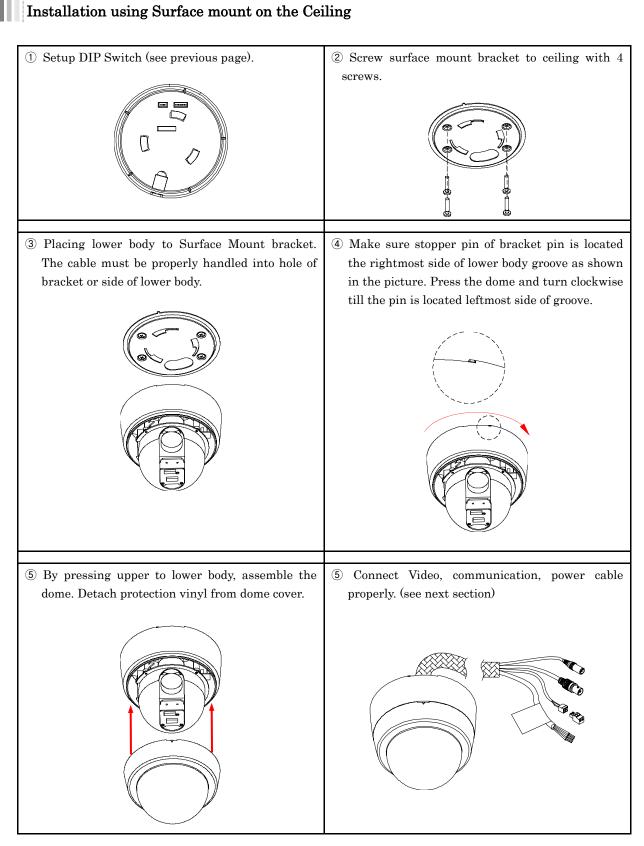

- Since Pin 3 is only for supplier, <u>DO NOT CHANGE THESE ITS</u> <u>ORIGINAL STATE</u>. If you change one of these, proper operation can not be achieved.
  - Pin 3 PAL / NTSC system selection of Camera. <u>DO NOT</u> <u>CHANGE THIS PIN</u>.

#### $\square$ RS-485 Termination Resistor

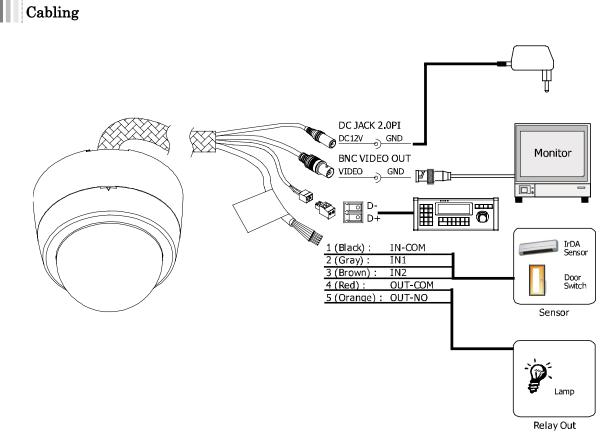

• Pin 4 is used for ON/OFF of RS-485 Termination. Normally, it must be OFF state. Especially when you have trouble with long Daisy chain style connection, turn ON this termination switch of last camera.

• Pin 4 RS-485 Termination Resistor (On/Off)

INSTALLATION

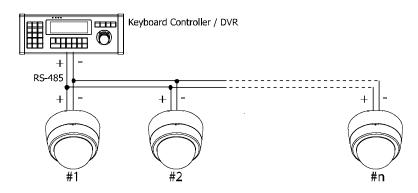

#### $\hfill\square$ Power Connection

• Please, check the voltage and current capacity of rated power carefully. Rated power is indicated in the back of main unit.

Rated Power	Input Voltage Range	Current Consumption
DC 12V	DC 11V ~ $18V$	0.8 A

□ RS-485 Communication

• For PTZ control, connect this line to keyboard and DVR. To control multiple cameras at the same time, RS-485 communication lines of them is connected in parallel as shown below.

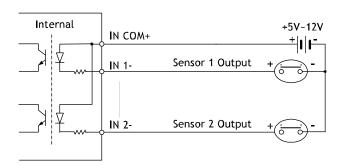

- $\hfill\square$  Video Connection
  - Connect with BNC coaxial cable.

#### $\square$ Alarm Input Connection

• Sensor Input

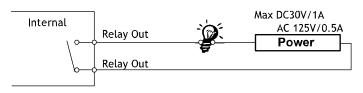

Before connecting sensors, check driving voltage and output signal type of the sensor. Since output signal types of the sensors are divided into Open Collector and Voltage Output type in general, the cabling must be done properly after considering these typed.

Signal	Description
IN COM+	Connect (+) cable of electric power source for Sensors to this port as shown in the circuit above.
IN1–, IN2–	Connect output of sensors for each port as shown in the circuit above.

If you want to use Alarm Input, the types of sensor must be selected in OSD menu. The sensor types are Normal Open and Normal. If sensor type is not selected properly, the alarm can be activated reversely.

⊙ Normal Open	Output Voltage is high state when sensor is activated
• Normal Close	Output Voltage is high state when sensor is not activated

Relay Output

#### Check points before operation

- Before power is applied, please check the cables carefully.
- The camera ID of the controller must be identical to that of the target camera. The camera ID can be checked by reading DIP switch of the camera.

**OPERATION** 

- If your controller supports multi-protocols, the protocol must be changed to match to that of the camera.
- If you changed camera protocol by changing DIP switch, the change will be effective after you reboot the camera.
- Since the operation method can be different for each controller available, refer to the manual for your controller if camera can not be controlled properly. The operation of this manual is based on the standard Pelco® Controller.

#### **Preset and Pattern Function Pre-Check**

• Check how to operate preset and pattern function with controller or DVR in advance to operate camera function fully when using controller or DVR.

< Go Preset >	Input [Preset Number] and press [Preset] button shortly.
< Set Preset >	Input [Preset Number] and press [Preset] button for more than 2 seconds.
< Run Pattern >	Input [Pattern Number] and press [Pattern] button shortly.
< Set Pattern >	Input [Pattern Number] and press [Pattern] button for more than 2 seconds.

• Refer to the following table when using standard Pelco® protocol controller.

• If controller or DVR has no pattern button or function, use shortcut keys with preset numbers. For more information, refer to "Reserved Preset" in this manual.

OPERATION (

3

## Starting OSD Menu

- Function Using the OSD menu, Preset, Pattern, Scan, Group and Alarm Input function can be configured for each application.
- Enter Menu <Go Preset> [95]

#### **Reserved Preset**

• Description	Some Preset numbers an	re reserved to special functions.
• Function	<go preset=""> [95]</go>	Enters into OSD menu
	<go preset=""> [131~134]</go>	: Runs Pattern Function $1 \sim 4$
	<go preset=""> [141~148]</go>	: Runs Scan Function $1 \sim 8$

	<set preset="">[167]</set>	: Zoom Proportional Jog OFF

Note: For more additional direct commands, refer Direct Key Command Manual.

SWING 8

OPERATION

#### Preset

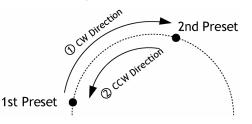

• Function Max. 127 positions can be stored as Preset position. The Preset number can be assigned from 1 to 128, but 95 is reserved for starting OSD menu.

Camera characteristics (i.e. White Balance, Auto Exposure) can be set up independently for each preset. Label should be blank and "Camera Adjust" should be set to "GENERAL" as default. All characteristics can be set up in OSD menu. One relay output can be reacted by

- Set Preset  $\langle \text{Set Preset} \rangle [1 \sim 128]$
- Run Preset <Go Preset> [1~128]
- Delete Preset To delete Preset, use OSD menu.

### Scan

• Function By using Scan function, you can make camera to move between 2 Preset positions repeatedly. When Scan function runs, camera moves from the preset assigned as the 1st point to the preset assigned as the 2nd point in CW(Clockwise) direction. Then camera moves from the preset assigned as the 2nd point to the preset assigned as the 1st point in CCW(Counterclockwise) direction.

In case that the preset assigned as the 1st point is same as the preset assigned as the 2nd point, camera turns on its axis by 360° in CW(Clockwise) direction and then it turns on its axis by 360° in CCW(Counterclockwise) direction.

Speed can be set up from 1°/sec to 180°/sec.

- Set Scan To set Scan, use OSD menu.
- Run Scan Method1) <Run Pattern> [Scan NO.+10] ex) Run Scan 3 : <Run Pattern> [13]
   Method2) <Go Preset> [Scan NO.+140] ex) Run Scan 3 : <Go Preset> [143]
- Delete Scan To delete Scan, use OSD menu.

#### Pattern

- Function Pattern Function is that a camera memorizes the path (mostly curve path) by joystick of controller for assigned time and revives the path exactly as it memorized.
   4 Patterns are available and Maximum 1200 communication commands can be stored in a pattern.
- Set Pattern Pattern can be created by one of following two methods.

Method 1) <Set Pattern> [Pattern NO.]

O Pattern editing screen is displayed as bellow.

EDIT PATTERN 1
[NEAR:SAVE / FAR:DELETE] 0/0/x1/N

- O Movement by Joystick and preset movement can be memorized in a pattern.
- O The rest memory size is displayed in progress bar.
- O To save the recording, press **NEAR** key and to cancel, press **FAR** key.

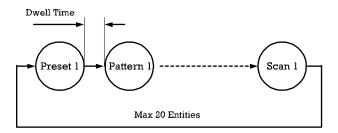

Method 2) OSD Using OSD Menu: See the section "How to use OSD Menu".

- Run Pattern
   Method 1) <Run Pattern> [Pattern NO.]
   ex) Run Pattern 2 : <Run Pattern> [2]
   Method 2) <Go Preset> [Pattern NO.+130]
   ex) Run Pattern 2: <Go Preset> [132]
- Delete Pattern Use OSD menu to delete a Pattern.

## Group

• Function The group function allows running sequence of Presets, Pattern and/or Scans. Max 8 group can be stored. Each group can have max 20 action entities which can be preset, pattern or scan. Preset speed can be set up and the repeat number of Pattern & Scan can be set up in Group setup. Dwell time between actions can be set up also.

• Set Group Use OSD Menu to create a Group.

 Run Group Method 1) <Run Pattern> [Group ex) Run Group 7: <Run Pattern> [27] NO.+20]
 Method 2) <Go Preset> [Group NO.+150] ex) Run Group 7: <Go Preset> [157]
 Delete Group Use OSD Menu to delete.

SCHEDULI	

3

## Schedule

• Function	The Schedule function allows running an appropriate function like Preset, Scan, Group, Pattern, Home move at designated day and time. For example, if you setup a rule Tuesday at 9:00AM and Preset 1 (say Main Gate), the camera will move to main gate every Tuesday at 9:00AM. If you choose Weekday, camera will move to Main gate everyday except weekend.
	It is noted that due to the real time clock, the time data will be kept regardless of blackout. The initial time and day setup is essential to proper Schedule function.
• Set Schedule	Use OSD Menu to create a Schedule
• Run Schedule	Use OSD Menu of Schedule Master Enable
• Delete Schedule	Use OSD Menu to delete.

ALARM 4 IN	PRIVACY
( <b>0</b> )	ZONE

#### **Other Functions**

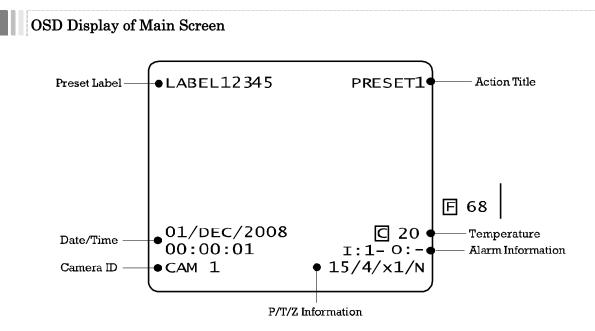

- Power Up Action This function enables to resume the last action executed before power down. Most of actions such as Preset, Pattern, Scan and Group are available for this function but Jog actions are not available to resume.
- Auto Flip If tilt angle exceeds  $90^{\circ}$ , Pan is automatically turned to opposite direction (+180°) to track the target continuously. If this function is set to OFF, tilt movement range is 0 ~  $95^{\circ}$ .
- Parking Action This function enables to locate the camera to specific position automatically if operator doesn't operate the controller for a while. The Park Time can be defined as an interval from 1 minute to 4 hours.
- Alarm Input 2 Alarm Inputs are used. If an external sensor is activated, camera can be set to move to corresponding preset position. It is noted that the latest alarm input is effective if multiple sensors are activated.
- Privacy Zone Mask To protect privacy, MAX. 4 Privacy Masks can be created on the arbitrary position to hide objects such as windows, shops or private house. With Spherical Coordinates system, powerful Privacy Zone Mask function is possible.
- WB(White Balance) and AE(Auto Exposure) can be set up independently for each GENERAL/SPECIAL Image Setup There are 2 modes, "General" mode & "Special" mode. The General mode means that WB or AE can be set up totally and simultaneously for all presets in "ZOOM CAMERA SETUP" menu. The Special mode means that WB or AE can be set up independently or separately for each preset in each preset setup menu. Each Special WB/AE value should activate correspondingly when camera arrives at each preset location.

During jog operation, General WB/AE value should be applied. All Special WB/AE value will not be changed although General WB/AE value change.

• Semi Auto Focus This mode exchanges focus mode automatically between Manual Focus mode and Auto Focus mode by operation. Manual Focus mode activates in preset operation and Auto Focus mode activates during jog operation. With Manual mode at presets, Focus data is memorized in each preset in advance and camera calls focus data in correspondence with presets as soon as camera arrives at a preset. It should shorten time to get focuses.

Focus mode changes to Auto Focus mode automatically when jog operation starts.

- P/T/Z Information Current Pan/Tilt angle in degree, zoom magnification and a compass direction.
- Camera ID Current Camera ID(Address).

"

Action Title Followings are possible Action Titles and their meaning.

'SET PRESET ×××"	When Preset $\times \times \times$ is stored
'PRESET ×××"	When camera reach to Preset $\times\!\!\times\!\!\times$
'PATTERN ×"	When Pattern $\times$ is in action
$"SCN \times / PRESET \times \times \times "$	When $Scan \times is$ in action
'UNDEFINED"	When undefined function is called to run

- Preset Label The Label stored for specific Preset.
- Alarm Information This information shows current state of Alarm Input. The "I" means Input and "D" is output. If an Input is **ON** state it will show the number of input. If an Input is **OFF** state, '-' will be displayed. In the same way "D:1" means output 1 is ON "D:-" is OFF.

Ex) When Point 2 of inputs are ON, and Output 1 is On, OSD will show as below

Temperature
 Date/Time
 Displays Current Date and Time.

#### General Rules of Key Operation for Menu

- The menu items surrounded with ( ) always has its sub menu.
- For all menu level, to go into sub menu, press **NEAR** key.
- To go to up-one-level menu, press **FAR** key.
- To move from items to item in the menu, use joystick in the Up/Down or Left/Right.
- To change a value of an item, use **Up/Down** of the joystick in the controller.
- Press **NEAR** key to save values and Press **FAR** key to cancel values.

#### Main Menu

#### ROOT MENU

### Privacy Zone Mask Setup

PRIVACY ZONE	·
→MASK NO	1 UNDEFINED
DISPLAY	OFF
CLEAR MASK	CANCEL
<edit mask=""></edit>	
BACK	
EXIT	

Select area in image to mask.

 $[1 \sim 4]$ 

• Mask No

Select Mask number. If the selected mask has already data, camera moves as it was set. Otherwise, "UNDEFINED" will be displayed under "Mask NO".

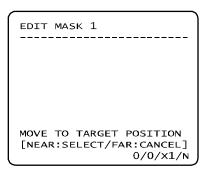

• Display [ON/OFF]

Sets if camera makes mask shows or not on images.

• Clear Mask [CANCEL/OK]

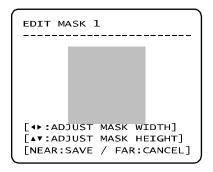

Deletes data in the selected mask NO.

 $\hfill\square$ Privacy Zone Area Setup

Move camera to area to mask. Then the menu to adjust mask size will be displayed.

#### Privacy Zone Size Adjustment

Adjust mask size. Use joystick or arrow buttons to adjust mask size.

- • (Left/Right) Adjusts mask width.
- ▲ ▼ (Up/Down) Adjusts mask height.

D Primory Zarra C'

#### **Motion Setup**

<pre> → PRESET LOCK OFF PWR UP ACTION ON AUTO FLIP ON JOG MAX SPEED 140/SEC JOG DIRECTION INVERSE FRZ IN PRESET OFF <parking action="" setup=""> <alarm i="" o="" setup=""> </alarm></parking></pre>	MOTION SETUP		
BACK FXTT	PWR UP ACTION ON AUTO FLIP ON JOG MAX SPEED 140/SEC JOG DIRECTION INVERSE FRZ IN PRESET OFF <parking action="" setup=""> <alarm i="" o="" setup=""> BACK</alarm></parking>		

Setup the general functions of Pan/Tilt motions.

$\bullet$ Preset Lock	[ON/OFF]	
	If Motion Lock is set to ON, it	
	to set up and delete Preset, S	

If Motion Lock is set to ON, it is impossible to set up and delete Preset, Scan, Pattern and Group. It is possible only to run those functions. To set up and delete those functions, enter into OSD menu.

• Power Up Action [ON/OFF]

Refer to "Other Functions" section.

• Auto Flip [ON/OFF]

Refer to "Other Functions" section.

• Jog Max Speed [1°/sec ~360°/sec]

Sets maximum jog speed. Jog speed is inversely proportional to zoom magnification. As zoom magnification goes up, pan/tilt speed goes down.

#### • Jog Direction [INVERSE/NORMAL]

If you set this to 'Inverse', the view in the screen is moving same direction with jog tilting. If 'Normal' is selected, the view in the screen is moving reversely.

#### • Freeze in Preset [ON/OFF]

At start point of preset movement, camera starts freezing the image of start point. Camera keeps displaying the image of start point during preset movement and does not display the images which camera gets during preset movement. As soon as camera stops at preset end point, camera starts displaying live images which it gets at preset end point.

This function availability should be different by models.

- Edit Preset Scene Redefine current Preset scene position (i.e. PTZ).
- Edit Preset Label Edits Label to show on monitor when preset runs. MAX. 10 alphabets are allowed.
- Clear Preset [CANCEL/OK]

Delete current Preset data

• CAM Adjust [GENERAL/SPECIAL]

WB(White Balance) and AE(Auto Exposure) can be set up independently for each preset. There are 2 modes, "General" mode & "Special" mode. The General mode means that WB or AE can be set up totally and simultaneously for all presets in "ZOOM CAMERA SETUP" menu.

The Special mode means that WB or AE can be set up independently or separately for each preset in each preset setup menu. Each Special WB/AE value should activate correspondingly when camera arrives at each preset location. During jog operation, General WB/AE value should be applied.

All Special WB/AE value should not change although General WB/AE value changes. If "Special" is selected, Menu to set WB/AE shows on monitor.

• Alarm out Relay Output can be linked with Preset run.

Ex) If it is turned to ON, Output 1 relay will be ON whenever you call this Preset.

 Edits label to show on monitor when camera arrives at presets. In Edit Label menu, a reverse rectangular is cursor. As soon as finishing selecting alphabet, cursor moves to the next digit.

<sup>(2)</sup> Using **Left/Right/Up/Down** of joystick, move to an appropriate character from the Character set. To choose that character, press the **NEAR** key.

Space Char. Back Space Char.

If you want to use blank, choose Space character (" "). If you want to delete a character before, use back space character ("  $\leftarrow$ ").

③ If you complete the Label editing, move cursor to "OK" and press NEAR key to save completed label. To abort current change, move cursor to "Cancel" and press NEAR key.

#### Scan Setup

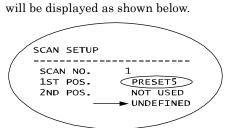

SCAN SETUP	```````````````````````````````````````
→SCAN NO. 1ST POS. 2ND POS.	1 NOT USED NOT USED
SCAN SPEED CLEAR SWING	30/SEC CANCEL
BACK EXIT	

• Scan Number [1~8]

Selects Scan number to edit. If a selected Scan has not defined, "NOT USED" is displayed in 1st Position and 2nd Position

4

1st Position [PRESET 1~128]
 2nd Position Set up the 2 position for Scan function. If a selected preset is not defined, "UNDEFINED"

When scan function runs, camera moves from the preset assigned as the 1st point to the preset assigned as the 2nd point in CW(Clockwise) direction. Then camera moves from the preset assigned as the 2nd point to the preset assigned as the 1st point in CCW(Counterclockwise) direction. In case that the preset assigned as the 1st point is same as the preset assigned as the 2nd point, camera turns on its axis by 360° in CW direction and then it turns on its axis by 360° in CCW direction.

• Scan Speed  $[1^{\circ}/\text{sec} \sim 180^{\circ}/\text{sec}]$ 

Sets Scan speed from 1°/sec to 180°/sec.

• Clear Scan [CANCEL/OK]

Deletes current Scan data.

### Pattern Setup

PATTERN SETUP	
$\rightarrow$ PATTERN NO.	1 UNDEFINED
CLR PATTERN <edit pattern<="" td=""><td>CANCEL</td></edit>	CANCEL

• Master Enable [ON/OFF]

Decide whether Schedule function is active or not.

- Clear Group [CANCEL/OK] Delete all data in current Menu
- Edit Group Start editing Group.
- After move the Cursor to the number by using Up/Down keys, press "Near"(Enter) Key to edit.

HOW TO USE OSD MENU

(5) Each field can be selected by Left/Right keys and the values in the field are changed using Up/Down keys.

The meaning of each value:

DAY Days: MON > TUE > WED> THU > FRI > SAT > SUN

WKD: Weekday

ALL: All days(Everyday)

- TIME 24hour Format
- ACT PRS(Preset), SCN(Scan), PTN(Pattern),GRP(Group) HOM(Home)
- ON/OFF Decide to make this rule effective or not

If you finish a rule, press  $\ensuremath{\textbf{Near}}$  key to select another rule.

Repeat this procedure to fill up the schedule in mind.

6 Example: see left setup.

- The second rule means camera will move to Preset 12 position at 7:35 on every Wednesday.

\* Note: If there are rules conflicts to each other, the higher number is, the higher priority has.

\* Note: If you assign undefined function, there will be no action.

\* Hint: Using reserved Preset, you can make various schedules. For example, PRS179 are PRS178 are Day and Night mode respectively.

#### Camera Setup

ZOOM CAMERA SETU	JP
→FOCUS MODE DIGITAL ZOOM LINE LOCK IMAGE FILP	SEMIAUTO ON OFF OFF
<white balance<br=""><auto exposure<="" td=""><td>52.01.</td></auto></white>	52.01.
BACK EXIT	

Setup the general functions of zoom camera module.

• Focus Mode

• Line Lock

#### [AUTO/MANUAL/SEMIAUTO]

Sets camera focus mode.

O <u>SEMIAUTO Mode</u>

This mode exchanges focus mode automatically between Manual Focus mode and Auto Focus mode. Manual Focus mode activates in preset operation and Auto Focus mode activates when jog operation starts.

With Manual mode at presets, Focus data is memorized in each preset in advance and camera calls focus data in correspondence with presets as soon as camera arrives at a preset.

• Digital Zoom [ON/OFF] Sets digital zoom function to ON/OFF. If this

is set to OFF, optical zoom function runs but zoom function stops at the end of optical zoom magnification.

#### [ON/OFF]

If Line lock sync is ON, video signal is synchronized with AC power. Video can be fluctuated after setting is changed.

• Image Flip [ON/OFF]

To display Upside down image.

□ White Balance Setup

WB SETUP - GLOE	3AL
→WB MODE ●RED ADJUST	AUTO
●BLUE ADJUST	
BACK EXIT	

WB Mode [AUTO/MANUAL] In Manual mode, Red and Blue level can be set up manually
Red Adjust [10~60]
Blue Adjust [10~60]

#### □ Auto Exposure Setup

AE SETUP - GLO	)BAL
$\rightarrow$ BACKLIGHT	OFF
DAY/NIGHT	AUT01
BRIGHTNESS	25
IRIS	AUTO
SHUTTER	ESC
AGC	NORMAL
SSNR	MIDDLE
SENS-UP	<auto></auto>
BACK	
EXIT	

• Backlight [ON/OFF]

Sets Backlight Compensation

#### [AUTO1/AUTO2/DAY/NIGHT]

- AUTO1 exchanges Day/Night mode faster than AUTO2.
- Brightness [0~100]

• Day/Night

Adjusts brightness of images. Iris, Shutter Speed and Gain are adjusted automatically in correspondence with this value.

#### • IRIS [AUTO/MANUAL(0~100)]

If Iris is set to Auto, Iris should have highest priority in adjusting AE and Shutter Speed should be fixed.

If Iris is set to Manual, Iris should be fixed and Iris has lower priority in adjusting AE, in comparison with others.

• Shutter Speed [ESC/A. Flicker/Manual(×128~1/120000 sec)]

If Iris is set to Manual and Shutter Speed is set to ESC, Shutter Speed should have highest priority. If Shutter Speed is set to A. Flicker, to remove Flicker, Shutter Speed should be set to 1/100 sec. for NTSC and 1/120 for PAL.

#### • AGC [OFF/NORMAL/HIGH]

Enhances image brightness automatically in case that luminance level of image signal is too low.

#### • SSNR [OFF/LOW/MIDDLE/HIGH]

Enhances images by deducting noises when gain level of images is too high.

#### • SENS-UP [AUTO(2~128)/OFF]

Activates Slow Shutter function when luminance of image (signal) is too dark.

It is possible to set up the maximum number of frames piled up one on another by Slow Shutter function.
